

Natural Deduction

Conditional Proof

$A \rightarrow C$

① Assume A

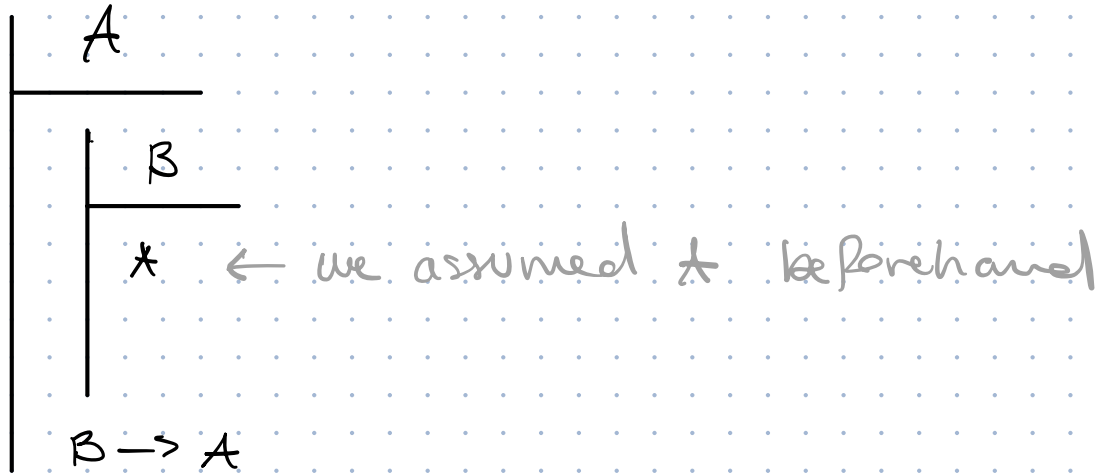

② Reasoning

③ Infer C

④ Conclude $A \rightarrow C \rightarrow$ cancel assumption

Examples

Prove $\vdash A \rightarrow (B \rightarrow A)$

$A \rightarrow (B \rightarrow A)$

Rules

① Introduction rule \rightarrow introduce connectives into a proof

② Elimination rule \rightarrow take connective out

 $\rightarrow E$ (Modus Ponens)
 $\rightarrow E$ (Modus Ponens)
 $\rightarrow I$ Conditional Proof

$(p \wedge q) \rightarrow r$

Strategies

(1) Look at the target

$$A \vdash B \rightarrow C$$

(1) A as premise

(2) Assume B

(3) Use premises (1) + derived to infer C

(4) Infer $B \rightarrow C$
